

CENSUS AND SURVEY MICRODATA WORKSHOP

*Free workshop for students and faculty
using international census and survey microdata*

85 countries

300 census samples

672 million person records

IPUMS International facilitates comparative international research by providing:

- Harmonized variable coding systems
- Constructed pointer variables to analyze household relationships
- Extensive documentation to aid in the interpretation of data
- On-line interactive data tabulator

Participants will learn how to navigate the IPUMS web system to find the data and documentation they need for research. The workshop takes place in a computing environment and includes hands-on exercises to familiarize participants with key features and functions of the IPUMS data access system.

- Overview of the IPUMS database
- Data discovery and documentation orientation (interactive)
- Data registration application tips
- Create a custom microdata extract (interactive)
- Tabulator orientation (interactive)
- Statistical analysis demonstration
